

# Setting the Table for a Science and Technology Strategy Update

**SLIDES FOR DISCUSSION SESSION**

# 4 Strategic Considerations

1. Which strategies and associated programs still make sense and which should be altered or dropped?
2. Within strategies which programs are functioning at a high level and well positioned for the next five years.
3. Are there new and/or significant gaps in strategies or program responses that were not on the radar in 2000 that need to be addressed?
4. Based on the findings to date, are there new opportunities and challenges that beg new strategies and program actions?

# Fomenting Discussion

- As a starting point, are these the right key strategy areas? If not, what would you change?
  - Enterprise Development
  - Manufacturing Modernization
  - Technological Infrastructure
  - People

# Strategic Actions From the Last Plan

- Pension Fund Investment Authorization
- R&D Vouchers
- Kentucky Commercialization Fund
- Entrepreneurial Policy Audit
- Manufacturing Modernization System
- Regional Technology Service Corporations
- Kentucky Science and Engineering Foundation
- Strategic Technology Initiative
- Dedicated Trust Funds for Research
- Premium Compensation for Math and Science Teachers
